AGENCY
CHAPRA, MAY 21

One person was killed and two others were injured after a clash erupted between workers of BJP and Rashtriya Janata Dal in Bihar's Chapra on Tuesday, a day after the fifth phase of polling.

Saran District Magistrate Aman Samir said that tension erupted yesterday after a candidate came near a polling station and a fight broke out on Tuesday morning between supporters of two groups. Two persons have been arrested in the case.

The police also carried out a flag march appealing to people to maintain their calm.

The district administration has also ordered internet shutdown for two days as a precautionary measure.

Aman Samir said sufficient police deployment has been made and officers are also patrolling, adding that the situation is currently "under control."

"The accused are being identified and action will be taken against them. We appeal to everyone to maintain peace. Two people have been arrested...We are patrolling continuously and sufficient deployment has been made. The situation is under control," DM Aman Samir said.

"For precaution, we sought permission for a two-day internet shutdown. We have received the permission from the headquarters," he added.

Strong govt needs to be formed at Centre : PM Modi

AGENCY
MAHARAJGANJ, MAY 21

Prime Minister Narendra Modi on Tuesday stressed that a developed Bihar and a developed India have to be made and said a strong government needs to be formed at the Centre for your bright future.

Addressing a public meeting in Bihar's Maharajganj, PM Modi said, "For your bright future, a strong government needs to be formed at the centre. As June 4 is nearing the abuses of the INDI alliance for Modi are increasing..."

"..They (INDIA alliance) cannot tolerate that the people of the country are going to re-elect Modi for the next 5 years...," PM Modi said, adding, "For your future & the future of your children Viksit Bihar (Developed Bihar) and Viksit Bharat (Developed India] has to be made," the PM added.

PM Modi accused the INDIA bloc of being an alliance of parties tainted by corruption and nepotism.

"The platform of INDI Alliance is not a political platform, it seems like a conference of scamsters of lakhs and crores. Scamsters of about 20 lakh crore rupees sit together on their platform. When they come together, three evils are clearly visible in them- They are extremely communal. They are extremely casteist and they are staunch nepotists."

CM Mann campaigns in Lambi, urges people to vote for Gurmeet Khuddian

BUREAU
BATHINDA/CHANDIGARH, MAY 21

Chief Minister Bhagwant Mann on Tuesday campaigned for Aam Aadmi Party (AAP) candidate Gurmeet Singh Khuddian from Bathinda. Mann addressed a huge public meeting in Bathinda and appealed to the people to defeat Akali Dal's Harsimrat Kaur Badal and make Gurmeet Khuddian victor.

During his speech, Chief Minister Bhagwat Mann recited Sant Ram Udaasi's poem 'Maghda Rahi Ve Surja Kammiyaan De Vehde' and said that we are people who believe in Sant Ram Udaasi, Shaheed Bhagat Singh and Baba Saheb Bhimrao Ambedkar. He said that after taking oath as Chief Minister, the first thing I did was to put the photos of Shaheed Bhagat Singh and Ambedkar in government offices instead of leaders, because Bhagat Singh sacrificed his life for freedom to the country and Ambedkar ensured freedom for everyone by writing the Constitution of the country.

Mann said that Baba Saheb Bhimrao Ambedkar used to say that the poverty of the country cannot be removed by green card, blue card, red card and yellow card. Poverty can be eradicated only through education. That is why Baba Saheb laid great emphasis on education.

BJP attacks Cong govt over Himachal forest fires

AGENCY
SHIMLA, MAY 21

BJP state spokesperson Mahendra Dharmani has expressed deep concern over the government's apparent lack of effective measures in tackling increasing daily cases of forest fires that is destroying the picturesque hills of Himachal Pradesh.

Considered among the safest refuge for Delhiites from sweltering heatwaves, Himachal's current rate of forest fire incidents is causing alarm among the people.

As per Fire Department data, in past 24 hours a total of 116 incidents of fire have been reported in the state, which caused loss of 1,582.6 hectares of forest area.

The fires have been frequent particularly during the dry summer and winter months, causing significant damage to the state's natural resources, wildlife, and environment. The annual calamity is also wreaking havoc to the state's rich forest wealth. The districts of Shimla and Solan are among the worst hit, with vast areas of forest land being consumed by raging flames that pose serious threat to wildlife, loss of habitat and often fatal accidents.

"Known for its lush green forests and serene landscapes, this hill state is facing a grave environmental crisis," Dharmani said raising alarm for the state government. The BJP spokesperson has criticised the Congress-led state government for its lack of a concrete action plan to prevent and control these fires. He emphasises that the forest department is understaffed and ill-equipped to deal with the situation, highlighting a chronic neglect that spans multiple administrations.

SANJAY AGGARWAL
DHARAMSHALA, MAY 21

Anand Sharma, Congress candidate from Kangra-Chamba parliamentary seat, said in Indora on Tuesday that Narendra Modi is making claims about the progress of the country, all this has not happened overnight or during his ten years of tenure. For this, Congress leaders Indira Gandhi and Rajiv Gandhi have even sacrificed their lives. He appealed to the people of the entire state including Kangra-Chamba parliamentary constituency and said that their one vote will decide the fate of India.

This will decide which ideology will take the country forward. He said that in Himachal Pradesh too, attempts were made to topple the government through horse trading and defection but they did not succeed. He claimed that the people of Himachal are going to teach a lesson to BJP in the Vis by-election. Anand Sharma said that the people of the country have understood whether the promises made to the people of the country 10 years ago have been fulfilled or not. BJP and PM Modi do not even talk about employment and inflation, they cannot utter a word about it.

He said that PM Modi makes a tempting promise every time he goes among the people and then forgets it, but this time people will not be duped. The thinking of this party is inclusive. On the other hand, there is such a party and ideology in the form of BJP whose thinking is narrow and limited, which is drawing lines between the people. BJP has never been true well wisher of weaker sections: Prem Kaushal

RAJNEESH SHARMA
HAMIRPUR: Union Minister Anurag Thakur is attempting to quell the anger of SC, ST, and OBC communities towards the BJP by claiming to be their ally. In a statement, Himachal Pradesh Congress Chief Spokesperson Prem Kaushal asserted that the BJP has never been a true ally of weaker sections and has always treated Scheduled Caste communities as second-class citizens.

Kaushal questioned why, if the BJP truly supports weaker sections, it opposes caste-based and economic census. He argued that under Modi's rule, policies were crafted to benefit wealthy donors, while the government sold public sector enterprises to friendly industrialists, undermining job creation and systematically dismantling the reservation system. Kaushal claimed that the BJP is losing ground nationally and that Anurag Thakur, foreseeing his defeat, is relying on falsehoods to save himself. However, the people of Hamirpur Lok Sabha constituency are determined to vote him out, as they are tired of his deceit and empty promises.

Instead of addressing local issues, Thakur distracts the public with irrelevant national and international topics. The people of Hamirpur, according to Kaushal, want accountability for issues like the Old Pension Scheme (OPS), the Agnipath scheme, the central government's indifferent response to disasters, and the unfulfilled promise of bringing rail connectivity to Hamirpur.

Sukhu government responsible for worsening conditions of Dharamshala: Sudhir Sharma

SANJAY AGGARWAL
DHARAMSHALA, MAY 21

BJP candidate from Dharamshala Sudhir Sharma said that Sukhu government is the reason for worsening the conditions in Dharamshala. Due to the Congress government of the state, the wheel of development has stopped in Dharamshala. Sudhir Sharma said that the time has come, times will change and circumstances will also change. Now the time is not far when there will be BJP government in the center and state. He said that I have brought development in Dharamshala and the people want further development also. The elections in Dharamshala constituency are about the fight for honor and rights. He said that in the last one and a half years, the Sukku government has misled the public in the name of guarantees, empty treasury and development. The people of Dharamshala are well aware of the truth. Sukhu cannot run away from the truth. Sudhir Sharma said that our aim is to connect the youth of Dharamsala with employment. Today it feels very sad when the youth work in foreign states. Half of the salary they receive is spent on accommodation and food. In such a situation, if our Dharamshala and Himachal become prosperous by providing employment then the youth will also be happy.

By staying in his own home, in his own city, he will be able to earn good employment and will also be able to spend time at his home. Sudhir Sharma said that the country is progressing rapidly under the rule of Modi government. But ever since the government of happiness came to power in the state, everyone has experienced only sorrow. If no work was done in 15 months, we also had to make changes. But this change will not go in vain and the change will decide the future of Dharamshala. Sudhir Sharma said that development of Dharamshala will be my priority. Many big projects of Dharamshala are pending in Sukhu government. In such a situation, those projects will be completed soon and many big projects will be brought to Dharamshala from the Modi government at the Centre. If the country is progressing then why not the states? Sudhir Sharma met people in many areas of Vis region on Tuesday and appealed to vote in favor of BJP.

Addressing a public meeting here in favour of NDA candidates, the PM said June 4 will prove to be a big jolt for the opposition bloc. "It will come as a big blow to their sinister designs" as the INDIA bloc is dividing the society on communal lines, pursuing appeasement policy, changing the Constitution and snatching reservation from OBCs and giving it to Muslims, he added.

It was a well known fact that Congress and other constituents of INDIA bloc, had ill intention of snatching reservation from the OBCs and giving the same to Muslims, he pointed out. In its long rule of 60 years in the country, Congress had never cared for the poor, instead the party leaders engineered one scam after another, he alleged.

They had not ever bothered about poor and done nothing for them during their tenures in power, he remarked.

RAKESH JINDAL
PATIALA, MAY 21

Patiala Deputy Commissioner Showkat Ahmad Parrey has appealed to the voters to use the right to vote under the constitution in all circumstances. He said that everyone should use their right to vote in every situation and should preserve this right found in the system of democracy.

Participating as the chief guest during the program called 'Chon Utsav' organized at Punjabi University today, Mr. Parrey said that the most educated section of the society lives in the universities. Only by doing this can we save our great democracy for which we have had to struggle for centuries.

Registrar Prof. Speaking on this occasion, Navjot Kaur said that if we do not use our right to vote, then we have no right to speak about our other rights. District Sweep Nodal Officer Dr. During his address on this occasion, Savinder Singh Rekhi gave information about election-related apps and websites.

Modest assessment

Last month, the International Monetary Fund had forecast world output to grow at the same pace in 2024 and in 2025 as last year. This is reassuring. However, a 3.2% growth of the world economy is low by historical standards and the agency's outlook beyond that is more sober. The world economy, it has been foreseen, would slow down to 2.8% by the end of the decade which is one percentage point lower than its pre-pandemic average. It notes that medium-term growth prospects have consistently been revised downward since the 2008-09 financial crisis. The roots of this decline are traceable to the early 2000s for advanced economies, whereas for emerging market and developing economies, where India is grouped, the trend set in after 2008-09. The research identifying the factors depressing medium-term growth has significant takeaways for India, which is basking in its recent economic performance.

Taking stock of India's short-term growth trajectory is useful to start with. The IMF's April 2024 economic outlook projects real GDP growth slowing to 6.8% and 6.5%, respectively, this year and the next, following a 7.8% increase in 2023-24. These growth rates do stand out in a cross-country perspective. However, we must take a longer, analytical perspective. This is necessary for improved sight on the future path and for better policy planning and response.First, the 9.7%, 7.0%, and 7.6% real GDP growth in succession after the pandemic still leaves national economic output 8% lower than it would have been if the economy had not contracted by -5.8% in 2020-21 and grown at trend 6.5% throughout instead. Some economists peg India's trend growth to be lower at 6%, in which case the size of the economy is ~6% smaller. To put this more generally, the economy is still a laggard by at least one and a half years, if not more, despite the strong recovery from the pandemic. Therefore, there's a significant amount of catch-up growth that remains in the pipeline.

One can internalise this further at the per person level for a better understanding of the extent of income loss or setback in economic well-being and living standards, or the weakened spending capacity of the average Indian in the period. What is important to grasp here is that given the extent of output loss that is still to be recouped after the pandemic, these growth rates should not surprise us. The recuperation is only to be expected. Rather attention ought to be on the medium-term prospects. Estimates of India's economic size, the year by which it will reach a higher world ranking, abound in the public discourse.

China backs Russia on Ukraine war

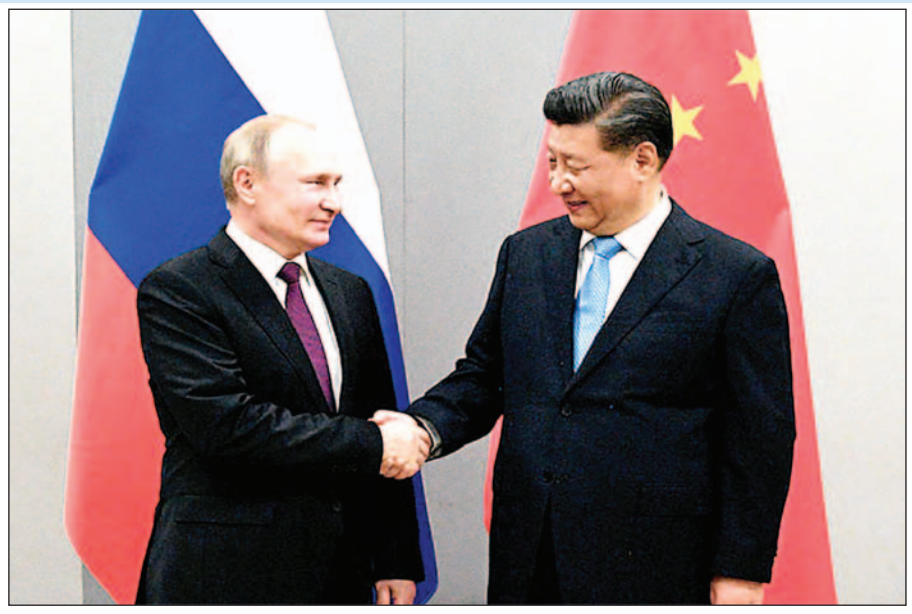

Instead of calling Russia to halt its military invasion of Ukraine, China is supporting its ally as fully as it can without triggering Western sanctions. The farewell hug between the autocratic leaders of the respective nations - Chairman Xi Jinping and President Vladimir Putin - made a mockery of China's profession of being a neutral party.

In his first overseas trip after commencing his fifth term in power, Putin visited China on 16-17 May. The occasion marked the 75th anniversary of diplomatic relations between the two countries, and a 7,000-word joint statement enthused that "Russian- Chinese relations stand the test of rapid changes in the world, demonstrating strength and stability, and are experiencing the best period in their history".

Beijing previously declared a "no-limits strategic partnership" with Moscow, and the state visit reinforced the closeness between the two regimes. Instead of urging an end to the war, Xi embraced the Russian strongman and issued assurances of undying support. The joint statement noted the nations would "further deepen mutual military trust and cooperation". This includes expansion of military exercises, regular maritime and air patrols, and strengthening bilateral and multilateral coordination.

Cooperation will occur in security-related fields such as deep-space exploration, satellite navigation systems, open-source technologies, artificial intelligence, telecommunications, radio frequency coordination, Internet of Things, cyber and data security.

The two leaders, united in their defiance of the USA, accused Washington DC of violating the strategic nuclear balance and non-proliferation (even though Russia refused to comply with the Intermediate-Range Nuclear Forces Treaty and China refuses to join any treaty), the deployment of land-based intermediate missiles, militarizing space and conducting exercises targeting Russia and China.

Furthermore, at a joint press conference on May 16, the two allies agreed that "a political settlement of the Ukrainian crisis is the correct direction". Xi added that his country would like to "play a constructive role" in restoring peace on the European continent.

However, China is in no position to act as intermediary. Xi has met personally or spoken to Putin by phone a whopping 40+ times in the past decade or so. By contrast, Xi has spoken to Ukrainian President Volodymyr Zelenskyy just once since the Russian invasion, and that was more than a year after the invasion. This stark fact shows which side of history Xi is on.

After meeting Xi, Putin visited the Harbin Institute of Technology in the northeast province of Heilongjiang on May 17. This institute is sanctioned by the USA because of its association with the People's Liberation Army.

Putin was accompanied by his new Defense Minister Andrei Belousov, as well as Yuriy Borisov, who heads the Russian space agency Roscosmos.

The Chinese government stated, "The relationship has become a fine example for major countries and neighboring countries to treat each other with respect and candor, and pursue amity and mutual benefit." Xi said too that "the steady development of China-Russia relations is not only in the fundamental interests of the two countries and the two peoples, but also conducive to peace, stability and prosperity of the region and the world at large".

Yet it is difficult to square "peace and stability" with Xi's ongoing support for Russia's warmongering.

Meanwhile, Putin laughably said the two sides are "jointly committed to promoting the establishment of a more democratic multipolar world order". Democracy is not in either regime's lexicon, but they are united in subverting the dominance of the USA.

China repeated the Five Principles of Peaceful Coexistence, comprising mutual respect for sovereignty and territorial integrity; mutual non-aggression; non-interference in each other's internal affairs; equality and mutual benefit; and peaceful coexistence. At odds with this, however, Xi is mutually supplying equipment to keep Russia's aggressive war machine fighting.

Indeed, the USA has accused China of being the "primary contributor" to Moscow's war. Indeed, it allegedly provides some 70 per cent of Russian machine tool imports and 90 per cent of microelectronics. Earlier this month, the US Department of Treasury imposed sanctions on 22 Chinese companies for helping Russia circumvent Western sanctions.

Only the most diehard supporters could believe China's machinations to appear as a neutral party and responsible stakeholder in the Ukraine conflict. Beijing has not once condemned Russia for its actions, and has upheld Putin's wild justifications for war at every opportunity.

Inflation in Pakistan continues to haunt salaried employees

The salaried class in Pakistan has been struggling to make ends meet as inflation is now the biggest issue faced by the general public, there is no choice but to compromise and sometimes cheat to ensure survival.

Amjad Iqbal, a resident of Lahore and an expert on the matter, said, "There is no doubt that the income of an individual in Pakistan has not increased. Notably, the business class of the country in the case of inflation is not that affected, as they can adjust their earnings by increasing and decreasing their profit margins. These people increase their profit margins when inflation increases and decrease their margins when inflation rates are controlled. But the ones most affected are the people who have a fixed monthly income."

"These salaried employees are the most important part of Pakistan's economy, and it continues to suffer. If they have some money left with them they only boost the economy, these are the ones who spend during the festival season enabling the production cycle to continue. But this part of Pakistan's economy remains at risk now. And if they continue to remain in such a miserable condition then, who will be spent during the festive season," he added.

Also, while highlighting the issue of tax fraud, Iqbal mentioned, "Our tax to GDP ratio currently is not that much. But, because we have never paid our taxes with honesty, that is why we find paying taxes difficult.

US President slams International Criminal Court's request to arrest Israel PM

US President Joe Biden said on Monday that the International Criminal Court (ICC) prosecutor's application for arrest warrants against the Israeli leaders is 'outrageous' and reaffirmed his support for Israel amid ongoing war with Hamas.

President Biden also asserted that there is no 'equivalence' between Israel and Hamas. "The ICC prosecutor's application for arrest warrants against Israeli leaders is outrageous. And let me be clear: whatever this prosecutor might imply, there is no equivalence -- none -- between Israel and Hamas. We will always stand with Israel against threats to its security," President Biden said in a statement.

The chief prosecutor of the International Criminal Court (ICC) has applied for arrest warrants against top Israeli and Hamas leaders for alleged war crimes.

ICC Prosecutor Karim Khan said on Monday that his office had applied for arrest warrants for Israeli and Hamas leaders for alleged crimes committed during the Hamas-led October 7 attack on southern Israel and Israel's subsequent war on Gaza.

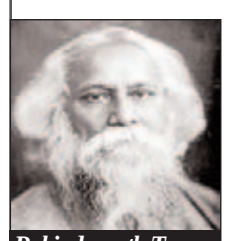

Moreover, the US State Department also issued its statement over the matter and rejected the announcement from the ICC Prosecutor, calling it 'shameful'. "The United States fundamentally rejects the announcement today from the Prosecutor of the International Criminal Court (ICC) that he is applying for arrest warrants for senior Israeli officials, together with warrants for Hamas terrorists. We reject the Prosecutor's equivalence of Israel with Hamas. It is shameful. Hamas is a brutal terrorist organization that carried out the worst massacre of Jews since the Holocaust and is still holding dozens of innocent people hostage, including Americans," US State departement said in a statement.

POEM

She

She who ever had remained in the depth of my being, in the twilight of gleams and of glimpses; she who never opened her veils in the morning light, will be my last gift to thee, my God, folded in my final song. Words have wooed yet failed to win her; persuasion has stretched to her its eager arms in vain. I have roamed from country to country keeping her in the core of my heart, and around her have risen and fallen the growth and decay of my life.

Researchers discover new biomarker to diagnose Alzheimer's in asymptomatic stages

A novel biomarker for Alzheimer's disease in its asymptomatic phases has been discovered by a recent study headed by the Molecular and Cellular Neurobiotechnology group at the Institute for Bioengineering of Catalonia (IBEC) and the University of Barcelona.

The molecule is called miR-519a-3p, and it is a microRNA that has been directly connected to the expression of the cellular prion protein (PrPC), which is dysregulated in patients with Alzheimer's disease and other neurodegenerative illnesses.

The hunt for stable, readily observable biomarkers in biofluids, such microRNAs, presents a chance to identify Alzheimer's early on when the disease is asymptomatic. This condition, which affects over 35 million people globally, might be diagnosed and treated far more effectively with early detection.

The expression of some microRNAs is known to be deregulated in Alzheimer's patients. However, this is the first time that this microRNA has been specifically linked to the decrease in cellular prion protein production during disease progression. "Currently, tests to diagnose Alzheimer's disease are usually carried out after the onset of symptoms, when there is already underlying cognitive impairment. We believe that the detection of this microRNA may help to establish additional criteria for a more accurate diagnosis in the early stages of the disease," explains IBEC principal investigator Jose Antonio del Rio, full professor at the Faculty of Biology and the Institute of Neurosciences of the University of Barcelona (UB) and co-leader of the study. The study also comparatively analyses the presence of the biomarker in samples from other neurodegenerative diseases:

The hunt for stable, readily observable biomarkers in biofluids, such microRNAs, presents a chance to identify Alzheimer's early on when the disease is asymptomatic. This condition, which affects over 35 million people globally, might be diagnosed and treated far more effectively with early detection.

The expression of some microRNAs is known to be deregulated in Alzheimer's patients. However, this is the first time that this microRNA has been specifically linked to the decrease in cellular prion protein production during disease progression.

If our goal is to use miR-519a-3p as a biomarker to detect Alzheimer's dementia in hypothetically healthy people, it is essential to ensure that its levels are not altered in other neurodegenerative diseases.

In our study, we compared the levels of this biomarker in samples from other tauopathies and Parkinson's disease, confirming that the changes in miR-519a-3p are specific to Alzheimer's disease," said IBEC senior researcher Rosalina Gavin, UB associate professor and co-leader of the study.

Here's why your skin needs to go green

Incorporating green vegetables into your diet can significantly enhance the health of your skin due to the abundance of essential nutrients and beneficial compounds in them. Indian greens such as spinach, fenugreek leaves (methi), amaranth leaves (below), and mustard greens (sarson) are not only delicious, but also packed with essential nutrients that promote healthy, glowing skin.

Greens Are High In Antioxidants

One of the key advantages of Indian greens for skin health is their high antioxidant content. Antioxidants help protect the skin from the oxidative stress caused by free radicals, thus preventing premature signs of ageing such as wrinkles, fine lines, and dullness. Spinach, a staple in Indian cuisine, is particularly rich in antioxidants such as vitamins C and E and beta-carotene, which promote skin rejuvenation and radiance.

Greens Have Anti-Inflammatory Properties

Indian greens are known for their anti-inflammatory properties, which can help get rid of skin conditions such as acne, eczema, and psoriasis. Methi leaves (above), for instance, contain compounds that possess anti-inflammatory effects, helping to soothe irritated skin and reduce redness and swelling.

Greens Are Abundant In Vitamins

Indian greens are also abundant in vitamins that are essential for skin health. Amaranth leaves are a great source of vitamin A, which supports skin cell turnover and regeneration, promoting a smoother, more youthful complexion. Mustard greens provide a significant dose of vitamin K, which aids in reducing dark circles under the eyes and strengthening blood vessels, resulting in improved skin tone and texture.

Greens Are Rich In Chlorophyll

Moreover, Indian greens are rich in chlorophyll, the green pigment responsible for their vibrant colour. Chlorophyll has detoxifying properties that help cleanse the skin from within, removing toxins and impurities that can lead to blemishes and breakouts. Including Indian greens in your diet can thus help promote clearer, healthier skin from the inside out.

To boost your intake of Indian greens and reap their skin-nourishing benefits, consider incorporating them into your meals in various ways.

You can add them to traditional dishes such as saag (cooked greens – above), dals, or sabzi (vegetable stir-fries).

You can incorporate them into parathas, rolls, tikkis, and soups.

To enhance the absorption of nutrients such as vitamin C found in these greens, pair them with vitamin C-rich foods such as citrus fruits, tomatoes, or bell peppers in your meals.

By prioritising nutrient-dense foods and maintaining a balanced diet rich in green vegetables, you can nourish your skin from the inside out.

7 Tips to Prevent Heat Stroke this Summer

As the summer season approaches, it's essential to take preventive measures to avoid heat-related illnesses, particularly heat stroke. Heat stroke is a severe medical condition that occurs when the body's temperature control system fails, leading to a dangerously high body temperature. Dr. Inderjeet Kaur, Manipal Hospital, Patiala share few tips that can help you to safeguard yourself against heat stroke:

1. Stay Hydrated: One of the most crucial preventive measures for heat stroke is staying hydrated. Dehydration can lead to heat exhaustion, which can further escalate to heat stroke. It's essential to drink plenty of water before, during, and after outdoor activities.

2. Dress Appropriately: Wearing lightweight, loose-fitting, and breathable clothing can help prevent heat stroke. Dark-colored clothing absorbs more heat, making it more challenging to regulate body temperature. Additionally, wearing a hat or a cap can help prevent sunburn and reduce heat absorption.

3. Avoid Prolonged Outdoor Activities During Peak Heat Hours: The sun's intensity is highest between 10:00 am and 4:00 pm. It's best to avoid prolonged outdoor activities during these peak heat hours.

4. Acclimatize Your Body: Acclimatization is the process by which the body adjusts to hot and humid weather conditions. This can be done by gradually increasing the duration and intensity of outdoor activities over several weeks. Acclimatization helps the body adapt to the heat, reducing the risk of heat stroke.

5. Use Sunscreen: Sunburn can lead to dehydration, which can further escalate to heat stroke. It's essential to use sunscreen with a sun protection factor (SPF) of at least 30 to protect the skin from sunburn. It's also advisable to reapply sunscreen every two hours or immediately after swimming or sweating.

6. Monitor High-Risk Individual: Certain individuals are at a higher risk of heat stroke, including infants, young children, older adults, and individuals with pre-existing medical conditions such as heart disease, diabetes, and obesity.

7. Stay Cool Indoors: If it's too hot outside, it's best to stay indoors in air-conditioned or well-ventilated areas. If air conditioning is not available, it's advisable to use fans to circulate air and create a breeze.

Rajasthan to face stern test against RCB in Eliminator

Ahmedabad: Sanju Samson's Rajasthan Royals will face a stern test of character as they look to arrest a shocking slide in a do-or-die IPL Eliminator against an in-form Royal Challengers Bengaluru, here on Wednesday.

The Royals, at one stage, had looked set for a top-place finish in the league stage before a string of four defeats and a washout in the last game against KKR resulted in Sanju Samson's side finishing third behind Sunrisers Hyderabad.

On the other hand, RCB have sensationally fought their way back from the brink of elimination. After losing seven of their first eight games this season, the team led by Faf du Plessis hit a dream run and finally knocked out defending champions Chennai Super Kings a few nights ago to seal a playoffs berth.

If Rajasthan Royals are coming off four losses and a rained-off game, RCB have notched up six consecutive wins to sound a warning to their rivals that they mean business in the playoffs.

RR, the 2008 IPL winners, suddenly find themselves as the underdogs, when a couple of weeks ago they were red-hot favourites.

When on song, Rajasthan Royals have shown they are unbeatable, but the last four games have exposed frailties in their batting and bowling.

The exit of Jos Buttler has taken a lot of firepower out of their batting and a lot will depend on Yashasvi Jaiswal (348 runs), skipper Samson (504) and Riyan Parag (531) to halt the slide.

Samson and Parag will once again be expected to deliver the goods for RR, with England's Tom Kohler-Cadmore expected to partner Jaiswal in what seems like a frail opening pair going by form and experience.

Shimron Hetmyer is expected to be available for the contest giving Rajasthan solidity in the lower order, which has not made a big contribution with the bat this season.

RRs strong bowling lineup could come in handy given the venue for the Eliminator has not been a batting paradise like the other grounds, where shorter boundaries and docile tracks have made the bowlers' job tougher.

The 200-run mark has been breached only twice in 12 innings this season at the Narendra Modi Stadium, which means the team having a disciplined bowling attack and a strong batting lineup is more likely to win here.

On the other hand, RCB's Virat Kohli continues to be the highest run-getter this season with 708 runs from 14 matches and could make the difference in the contest.

After initial struggles, RCB skipper Faf du Plessis has also found form with the bat to forge a dominating partnership at the top with Kohli, while Rajat Patidar (five half-centuries this season) has also given solidity at the top.

RCB have not been impacted much by the exit of England's Will Jacks, while veteran Dinesh Karthik is firing on all cylinders with a strike rate in excess of 195 lower down the order.

Indian teams set to compete in FIH Hockey Pro League 2023/24

ANTWERP : The Indian hockey teams are currently in Europe to see out the final stretch of their FIH Hockey Pro League 2023/24 campaign. Both teams will take on Argentina and Belgium in the mini-tournament in Antwerp from May 22 to May 26 before moving to London to compete against Germany and Great Britain in the mini-tournament from June 1 to June 9. The Indian Women's Hockey Team is placed sixth in the table after earning 8 points from 8 matches. So far, they have registered victories against the United States and Australia while also earning a shootout victory against the United States. Led by newly appointed Captain Salima Tete, the team will now look to earn maximum points from their remaining matches. Commenting on the outlook of the team ahead of the match, Salima said, "We had an intense training block in SAI while also playing practice matches against South Africa to prepare for these FIH Hockey Pro League matches. The point difference between us and second-placed China is just 7 points. We aim to close this gap in the remaining matches against Argentina, Belgium, Germany, and Great Britain in a bid to finish as high as we can."

The Indian Men's Hockey Team is placed 3rd in the table after amassing 15 points from 8 matches. They registered three victories across Rourkela and Bhubaneswar legs; once against Spain and twice over Ireland. They also earned two bonus points after shootout victories against Spain and the Netherlands. Led by Captain Harmanpreet Singh, the team will look to use the platform to prepare for the prestigious Paris 2024 Olympics set to begin on July 27.

"We are grateful to have this opportunity to test ourselves against tough opponents like Argentina, Belgium, Germany, and Great Britain ahead of the Paris 2024 Olympics. Undoubtedly, we are focused on the Olympics but we also need to give our best to finish as Champions and secure direct qualification for the 2026 Hockey World Cup as well. To achieve both these targets we will strive to give our all on the pitch and win all our matches," said captain Harmanpreet Singh ahead of the match against Argentina.

Both teams will begin their European leg on May 22 against Argentina, followed by back-to-back matches against Belgium on May 23 and May 25. They will take on Argentina again on May 26 before moving on to the final leg in London where they play Germany on June 1 and June 8 and take on hosts Great Britain on June 2 and June 9.

Australia finalise squad for T20 World Cup

Sydney. May 21 (UNI) Australia have locked in their final squad for the ICC Men's T20 World Cup 2024, confirming their 15-player group and travelling reserves.

Whilst picking an unchanged group for the playing squad from their preliminary list, Jake Fraser-McGurk and Matt Short will accompany the squad as reserves.

It means there is still no spot for Steve Smith and the likes of Jason Behrendorff and Tanveer Sangha with the ball for the four-week tournament in the West Indies and the USA.

Mitchell Marsh leads the team, with his promotion to full-time T20I confirmed by Australia alongside their original squad announcement on May1.

Left-arm spinner Ashton Agar won a recall despite not playing a T20I since the last T20 World Cup on Australian soil in 2022, while Marcus Stoinis, Tim David and Cameron Green join Glenn Maxwell made the final squad as all-rounder options, an ICC report said.

Australian players and staff will arrive in the West Indies in stages, with those competing in the Indian Premier League given time at home before joining the group.

Australian chair of selectors George Bailey said Fraser-McGurk and Short made "compelling cases" for selection, and provide better than adequate cover should squad members go down during the tournament.

"As the tournament proceeds, the short turnaround between fixtures makes it challenging to get players in at short notice in the event of injury," Bailey said.

"Matt provides the squad with an all-round skillset option, while Jake provides further batting cover," he said.

"Both players have exciting talents that can add to the squad if needed. If not, the experience will still be valuable in their respective development journeys at international level," Bailey added.

Australia open their T20 World Cup campaign against Oman in Barbados on June 5, before Group B fixtures against England, Namibia and Scotland.

Australia squad: Mitchell Marsh (c), Ashton Agar, Pat Cummins, Tim David, Nathan Ellis, Cameron Green, Josh Hazlewood, Travis Head, Josh Inglis, Glenn Maxwell, Mitchell Starc, Marcus Stoinis, Matthew Wade, David Warner, Adam Zampa

Travelling Reserves: Jake Fraser-McGurk, Matt Short All teams are allowed to make changes to their squad until May 25, after which any alteration will require approval from ICC's Event Technical Committee.

"Will leave no stone unturned...": Shooter Manu Bhaker aims for success at Paris Olympics

JHAJJAR (HARYANA): Indian shooter Manu Bhaker, who has secured a Paris 2024 Olympics quota, said she will leave no stone unturned to achieve her goals in the prestigious event and urged the Centre to provide a good shooting range in Haryana which will be useful for athletes in their training.

Bhaker secured a Paris 2024 Olympics quota for India after she finished fifth in the women's 25m pistol event at the Asian Shooting Championships 2023 in Changwon.

The Indian shooter said her family was with her at every step of her career and she had opportunities to choose.

"This is my second Olympics. Will leave no stone unturned this time in my efforts... Family support is important for career growth. I have always had flexibility in my career. I got options and the opportunity to choose whatever I wanted," Bhaker told ANI.

"I wish that what happened to me in the last Olympics would not happen in this games. Whatever the result may be, this time I will not leave any deficit in my preparation and performance and will give it my all. In Paris, I will participate in the three events and hopefully, everything will be fine," she added.

In her maiden Olympic appearance in Tokyo 2020, Manu Bhaker could not qualify for the finals of three events in which she participated - women's 10m air pistol, women's 25m pistol and mixed 10m air pistol.

Cannes: Richa Chadha, Ali Fazal's debut production 'Girls Will Be Girls' to be screened at 77th edition

Couple Richa Chadha and Ali Fazal's debut production 'Girls Will Be Girls' will be screened at the ongoing 77th edition of the Cannes Film Festival.
After its premiere at the SXSW Film Festival and making waves at the Sundance Film Festival earlier this year by winning the Audience Award in the World Dramatic Entry category and the Special Jury Award for Lead Actress Preeti Panigrahi, 'Girls Will Be Girls' is now scheduled to be screened at Cannes May 22nd and 23rd at the Alexandre III theatre and on May 24th at the Raimu Hall, as per a statement.
On the film making it to Cannes, Richa said, "We are thrilled to see 'Girls Will Be Girls' reach the Cannes Film Festival. This project is very close to our hearts, and the recognition it has received so far has been overwhelming. Producing this film has been a labour of love, and to see it resonate with audiences globally is incredibly fulfilling. We believe in the power of stories that challenge and inspire, and 'Girls Will Be Girls' does just that. It's a film that speaks to the complexities of growing up, and we can't wait for the Cannes audience to experience it."
Ali also expressed his excitement.
"From the very beginning, we knew 'Girls Will Be Girls' was a special project. The response at Sundance was beyond our expectations, and now premiering at Cannes is a dream come true. Suchi Talati has crafted a beautiful, poignant story that deserves this platform. We are proud to be part of a film that not only entertains but also sparks important conversations. This is just the beginning, and we are excited for what's to come," he said,
'Girls Will Be Girls' is produced by Chadha and Fazal's joint venture Pushing Buttons Studios, in collaboration with Blink Digital and Dolce Vita Films. Directed by Shuchi Talati, the film is a compelling story set in a boarding school in a small Himalayan hill town in northern India. Raktadeva is as humane as any other character in the series" : Rajesh Khattar

CHANDIGARH: There are many events and stories in the world of Baahubali and Mahishmati that are unheard, unseen and unwitnessed. Disney + Hotstar and Graphic India are set to bring you the prequel to the film franchise, Hotstar Specials' 'Baahubali: Crown of Blood', a story where Baahubali and Bhallaladeva will join hands to protect the great kingdom of Mahishmati and the throne against its greatest threat, the mysterious warlord, Raktadeva.

A Graphic India and Arka Mediaworks production, Baahubali: Crown of Blood is produced by visionary S.S. Rajamouli, Sharad Devarajan & Shobu Yarlagadda, directed and produced by Jeevan J. Kang & Navin John. Every villain has motives rooted in their past, not just a desire to be evil. They have reasons and experiences that shaped them into who they are today. To create a villain that audiences can connect with, even if they are ferocious, it takes a skilled writer and a well-crafted script that helps the audience understand the villain's intentions and why they do what they do. Talking about his character, Rajesh Khattar said, "I think Raktadeva is going to bring in the new element of intrigue & conflict to the world of Baahubali which is already a huge hit amongst viewers, as people don't know anything about him so that will be an addition. As the story unfolds the audience would want to know more about this character, his reasons for being the way he is. Baahubali being an iconic character, the story needed a formidable antagonist pitched against the might of Baahubali which Raktadeva is, and the audience will discover while watching the series. Full marks to the makers for creating a character like Raktadeva who in spite of being a negative force is still as humane as any other character in the series."

Bio Agri Inputs brand Inera ropes in MS Dhoni as Brand Ambassador

CHANDIGARH: Inera - a deep R&D bioscience firm developing agricultural biologicals, has announced MS Dhoni as their brand ambassador. As part of this partnership, Dhoni will support agricultural transformation by promoting the use of sustainable bio inputs to the masses. Reflecting on the collaboration, Dhoni said, "Inera's vision & solutions for bio-agriculture are transformative, and I am proud to advocate for this change. Agriculture has always been close to my heart and I'm looking forward to inspiring millions of farmers to adopt progressive agricultural practices, using high performance products offered by Inera."

Agricultural biologicals are gaining traction globally as sustainable alternatives to chemical inputs in farming. Driven by stringent environmental regulations and rising consumer demand for organic produce, regions like North America and Europe are leading adoption, with significant growth in Asia-Pacific and Latin America.
Recent policy initiatives by the Government of India like the Parampar-agat Krishi Vikas Yojana (PKVY) aim to promote bio inputs and provide financial support to farmers for adopting them. However, while India shows increasing interest in bio inputs, a gap still exists from a product perspective. Traditional bio inputs are known to have shelf-life & efficacy issues and are often limited in terms of performance and impact. Inera offers sustainable solutions in crop care & protection, with a product line that encompasses biofertilizers, biostimulants, and biocontrols. Inera's products are designed with proprietary technologies to solve specific problems including shelf life, stability & efficacy that are commonly faced by farmers & distributors. These biologicals have been extensively tested across multiple agro climatic conditions at the company's field trial facilities spanning 2.5 mn sq. ft. of area, the biggest such setup for biologicals in India. "In bringing MS Dhoni on board, we are welcoming a fervent advocate for sustainable farming," said Founder & Group CEO, Agam Khare. "Dhoni's unparalleled reach in rural India and his commitment to agriculture are crucial in driving the widespread adoption of bio inputs, and reviving India's agricultural prowess."
